FOREWORD

This research effort, presented as a Systematic Index of International Water Resources Treaties, Declarations, Acts and Cases by Basin, has been prepared in response to United Nations Water Conference Recommendation 93(g) which, on the consideration that:

"A CONCERTED AND SUSTAINED EFFORT IS REQUIRED TO STRENGTHEN INTERNATIONAL WATER LAW AS A MEANS OF PLACING CO-OPERATION AMONG STATES ON A FIRMER BASIS. THE NEED FOR PROGRESSIVE DEVELOPMENT AND CODIFICATION OF THE RULES OF INTERNATIONAL LAW REGULATING THE DEVELOPMENT AND USE OF SHARED WATER RESOURCES HAS BEEN THE GROWING CONCERN OF MANY GOVERNMENTS",

provides that:

"The United Nations system should be fully utilized in reviewing, collecting, disseminating and facilitating exchange of information and expertise on this question."

At the same time, this research work is intended to constitute part of the contribution of FAO to the International Law Commission of the United Nations (ILC) in its effort to codify the law of the non-navigational uses of international watercourses of which the ILC has requested the co-operation of the family of United Nations organizations.

Since the early 1950's, the United Nations system of organizations has produced number of documents on the law of international water resources, among which the most significant ones are E/ECE/136, Legal Aspects of Hydro-electric Development of Rivers and Lakes of Common Interest (1952); ST/LEG/SER.B/12, Legislative Texts and Treaty Provisions Concerning the Utilization of International Rivers for Other Purposes than Navigation (1963); A/5409, Legal Problems Relating to the Utilization and Use of International Rivers (1963); A/CN.4/274, Legal Problems Relating to the Non-navigational Uses of International Watercourses (1974); STA/ESA/5, Management of International Water Resources: Institutional and Legal Aspects, Natural Resources, Water Series No. 1 (1975); and Background Paper No. 1, The Law of International Water Resources, Some General Conventions, Declarations and Resolutions Adopted by Governments, International Legal Institutions and International Organizations on the Management of International Water Resources, FAO Legislation Branch (1970; revised 1978).

It is hoped that the present document will prove to be a useful addition to the above documentation. It is the result of a collective endeavour in which, from the original idea of the writer, several specialists have collaborated.

The material compiled, which covers over 2 000 international legal instruments stretching from the year 805 to 1977, has been organized chronologically and tabulated with an indication, for each instrument, of the substance covered and of the water bodies, territories and basins concerned, together with the source of reference and any relevant remarks and annotations. In addition, Annexes have been drawn-up to provide for the identification of those legal instruments by basin, by country and by region. A detailed explanation of the mode in which this research was undertaken and of how the tabulated information is to be read is given in the ensuing Explanatory Note.

This research work does not purport to be complete; it may furthermore contain factual errors and mis-statements. It is published in the Legislative Studies and disseminated as widely as possible for the purpose of obtaining from its readers as many corrections and additions as possible which should help in making this document a fully reliable source of reference.

Depending on the response this research work will generate, it is hoped to proceed in the future with the computerization of an up-dated and corrected version for permanent retrieval and data output.

The bulk of the legal research was undertaken under contract by Prof. Carlo Curti Gialdino, a specialist in international water resources law, currently teaching at the Istituto Universitario Orientale, Naples, Italy; some 1 200 volumes of different treaty collections were scanned, along with dozens of specialized documents and periodicals. He should find here the expression of our appreciation for his untiring dedication to this monumental work.

Also appreciated has been the contribution of Mr. Lamberto Zannier, Law Graduate, University of Trieste, Italy, who has produced the politico-historical and geo-hydrological inputs to this work. Last but not least, our appreciation goes to Mr. Bernard J. Wohlwend, Legal Officer in this Branch, who has organized and co-ordinated this research programme and edited the present document.

Dante A. Caponera
Chief, Legislation Branch

AVANT-PROPOS

Ce travail de recherche, présenté sous forme de Répertoire systématique par bassin de traités, déclarations, textes législatifs et jurisprudence concernant les ressources en eau internationales, a été préparé en réponse à la Recommandation N° 93(g) de la Conférence des Nations Unies sur l'eau qui, ayant considéré que :

"EN VUE DE RENFORCER LE DROIT DES EAUX INTERNATIONALES, IL EST NECESSAIRE DE DEPLOYER DES EFFORTS CONCERTES ET SOUTENUS AFIN DE DONNER UNE BASE PLUS SOLIDE A LA COOPERATION ENTRE LES ETATS. DE NOMBREUX GOUVERNEMENTS SE PREOCCUPEENT DE PLUS EN PLUS DE LA NECESSITE D'UN DEVELOPPEMENT PROGRESSIF DES REGLES DU DROIT INTERNATIONAL QUI REGISSENT L'AMENAGEMENT ET L'UTILISATION DES RESSOURCES EN EAU PARTAGEES",

dispose que :

"Les ressources du système des Nations Unies soient pleinement utilisées pour passer en revue, rassembler et diffuser les renseignements et les données d'expérience sur cette question, et en faciliter l'échange."

Par la même occasion, il est prévu que ce travail de recherche constitue une partie de la contribution de la FAO aux efforts que déploie la Commission de droit international des Nations Unies (CDI) en matière de codification du droit des fleuves internationaux à des fins autres que la navigation, entreprise pour laquelle la CDI a sollicité la coopération de la famille des institutions des Nations Unies.

Dès le début des années 1950, le système des Nations Unies a produit de nombreux documents portant sur le droit des ressources en eau internationales parmi lesquels les plus significatifs sont : Aspects juridiques de l'aménagement hydro-électrique des fleuves et des lacs d'intérêt commun, E/ECE/136 (1952); Textes législatifs et dispositions de traités concernant l'utilisation des fleuves internationaux à des fins autres que la navigation, ST/LEG/SER.B/12 (1963); Problèmes juridiques posés par l'exploitation et l'utilisation des fleuves internationaux, A/5409 (1963); Problèmes juridiques que posent les utilisations des voies d'eau internationales à des fins autres que la navigation, A/CN.4/274 (1974); Gestion des ressources en eau internationales : Aspects institutionnels et juridiques, Ressources naturelles, Série Eau N° 1, Nations Unies, ST/ESA/5 (1976) et Document de référence N° 1, Le régime juridique des eaux internationales, quelques déclarations et résolutions adoptées par les institutions juridiques internationales formant le droit coutumier, les principes généraux et la doctrine concernant l'utilisation des ressources en eaux internationales, Service de législation de la FAO (1970; révisé en 1978).

Le présent document constituera sans doute une adjonction utile à la documentation ci-dessus. Il constitue le produit d'un effort collectif auquel, à partir de l'idée première du soussigné, divers spécialistes ont collaboré.

La matière ayant fait l'objet de cette compilation et qui recouvre plus de 2 000 instruments juridiques internationaux compris entre l'an 805 et 1977, a été organisée chronologiquement et mise sous forme de tables indiquant, pour chaque instrument, la substance traitée, les masses d'eau, les territoires et les bassins intéressés, la source consultée ainsi que toutes remarques et annotations pertinentes. Des Annexes ont en outre été établies aux fins de classer ces instruments juridiques par bassin, par pays et par région. Une explication détaillée du mode selon lequel la recherche a été effectuée et de la manière selon laquelle les tables doivent être consultées figure à la Note explicative ci-après.

Ce travail de recherche n'a pas la prétention d'être complet; il est vraisemblable qu'il contient en outre des erreurs de fait de même que des citations inexactes. Il est publié en tant qu'Etude législative pour être diffusé le plus largement possible et dans le but d'obtenir de ses lecteurs toutes les corrections et adjonctions qui permettront de faire de ce document une source de références pleinement fiable.

Selon la réponse qu'engendrera ce travail de recherche, il est envisagé de procéder ultérieurement à la mise sur ordinateur d'une version mise à jour et corrigée de cet ouvrage pour en faire une source permanente d'enregistrement et de diffusion de données.

L'ensemble de la recherche juridique a été confiée, sous contrat, au Prof. Carlo Curti Gialdino, spécialiste en droit des ressources en eau internationales et enseignant actuellement à l'Istituto Universitario Orientale de Naples, Italie; quelques 1 200 volumes de différentes collections de traités ont été dépouillés, ainsi que plusieurs dizaines de documents et revues spécialisées. Qu'il trouve ici l'expression de notre appréciation pour son inlassable dévouement à ce labeur monumental.

La contribution de M. Lamberto Zannier, Licencié en droit de l'Université de Trieste, Italie, qui a fourni les éléments politico-juridiques et géo-hydrologiques de cette recherche mérite également d'être citée. Enfin, l'expression de notre appréciation va également à M. Bernard J. Wohlwend, Juriste de ce Service, qui a organisé et coordonné ce programme de recherche, et a édité le présent document.

Dante A. Caponera
Chef du Service de législation

PREFACIO

Este trabajo de investigación, presentado como Repertorio sistemático por cuenca de tratados, declaraciones, textos legislativos y jurisprudencia relativos a los recursos hídricos internacionales, ha sido preparado en respuesta a la Recomendación N° 93(g) de la Conferencia de las Naciones Unidas sobre el Agua, la cual, habiendo considerado que:

"SE REQUIERE UN ESFUERZO CONCERTADO A FIN DE REFORZAR EL DERECHO DE AGUAS INTERNACIONAL COMO MEDIO DE ESTABLECER SOBRE UNA BASE MAS FIRME LA COOPERACION ENTRE LOS ESTADOS. PREOCUPA CADA VEZ MAS A NUMEROSOS GOBIERNOS LA NECESIDAD DE EFECTUAR UN DESARROLLO PROGRESIVO Y UNA CODIFICACION DE LAS NORMAS DEL DERECHO INTERNACIONAL QUE RIGEN EL DESARROLLO Y LA UTILIZACION DE LOS RECURSOS HIDRICOS COMPARTIDOS.",

establece que:

"Se aproveche plenamente el sistema de las Naciones Unidas para el examen, la obtención y la difusión de datos y para facilitar el intercambio de información y de experiencias acerca de esta cuestión. En consecuencia, el sistema debería organizarse a fin de proporcionar una asistencia cabal y coordinada a los Estados y a las comisiones de cuenca que la soliciten".

Al mismo tiempo se pretende que este trabajo de investigación constituya una parte de la contribución de la FAO a la Comisión de Derecho Internacional de las Naciones Unidas (CDI), en sus esfuerzos en materia de codificación del derecho de los ríos internacionales con fines distintos de la navegación, empresa para la que la CDI ha solicitado la cooperación de los organismos de la familia de las Naciones Unidas.

Desde el comienzo de los años 1950, el sistema de las Naciones Unidas ha preparado numerosos documentos sobre el derecho de los recursos hídricos internacionales, entre los cuales los más importantes son: Legal Aspects of Hydro-Electric Development of Rivers and Lakes of Common Interest, E/ECE/136 (1952); Legislative Texts and Treaty Provisions Concerning the Utilization of International Rivers for Other Purposes than Navigation, ST/LRG/SER.B/12 (1963); Problemas jurídicos relativos al aprovechamiento y uso de los ríos internacionales, A/5409 (1963); Problemas jurídicos relativos a los usos de los cursos de aguas internacionales para fines distintos de la navegación, A/CN.4/274 (1974); Ordenación de los recursos hidráulicos internacionales: aspectos institucionales y jurídicos, Recursos naturales, Serie del Agua, N° 1 STA/ESA/5 (1975); y Documento de Referencia N° 1, El régimen jurídico de las aguas internacionales: Algunas Convenciones generales, Declaraciones y Resoluciones adoptadas por Gobiernos, Instituciones jurídicas internacionales y Organizaciones internacionales sobre el manejo de los recursos hídricos internacionales, Subdirección de Legislación de la FAO (1970; ed. revisada en 1978).

El presente documento constituirá, sin duda, una adición útil a la documentación antes mencionada. Constituye el producto de un esfuerzo colectivo al que, a partir de la idea original del infrascrito, han colaborado diversos especialistas.

El material recopilado, que comprende más de 2.000 documentos jurídicos internacionales a partir del año 805 hasta 1977, ha sido organizado cronológicamente y en forma de cuadros, que indican, respecto de cada documento, la materia tratada, las masas de agua, los territorios y las cuencas interesados, la fuente consultada, así como todas las observaciones y anotaciones pertinentes. Figuran, además, Anexos, con el fin de clasificar estos documentos jurídicos por cuencas, por país y por región. En la Nota explicativa que figura a continuación se da una explicación detallada de la forma en que se han realizado las investigaciones y de la manera en que los cuadros deben ser consultados.

Este trabajo de investigación no pretende ser completo; contendrá, además, errores de hecho, así como citas inexactas. Se publica como "Estudio Legislativo" para que tenga la mayor difusión posible, con el fin de obtener de sus lectores todas las correcciones y adiciones que permitan hacer de este documento una fuente de referencias digna de confianza.

Según la respuesta que obtenga este trabajo de investigación, se considera la posibilidad de proceder ulteriormente, mediante un ordenador, a editar una versión actualizada y corregida de esta obra, para hacer de ella una fuente permanente de registro e inscripción de datos.

El conjunto de la investigación jurídica ha sido confiado, por contrato, al Profesor Carlo Curti Gialdino, un especialista de derecho de los recursos hídricos internacionales, que enseña actualmente en el Istituto Universitario Orientale de Nápoles, Italia; unos 1.200 volúmenes de diferentes colecciones de tratados han sido consultados, así como varias docenas de documentos y revistas especializadas. Que encuentre aquí la expresión de nuestro aprecio por su incansable dedicación a esta tarea monumental.

La contribución del Sr. Lamberto Zannier, Licenciado en Derecho por la Universidad de Trieste, Italia, que ha facilitado los elementos político-jurídicos y geo-hidrológicos de esta investigación merece, igualmente, ser citada. En fin, nuestro aprecio, asimismo, al Sr. Bernard J. Wohlwend, Oficial Jurídico de esta Subdirección, que ha organizado y coordinado este programa de investigaciones y ha editado el presente documento.

Dante A. Caponera
Jefe de la Subdirección
de Legislación

EXPLANATORY NOTE

1. Scope and mode of the research

The purpose of this research work has been to organize a source of reference to treaties and other international legal instruments dealing with the various aspects of non-maritime water resources management.

In addition to bilateral and multilateral treaties, unilateral declarations bearing on the legal status of international waters and multilateral declarations by governments, national legislative texts providing for measures having international implications, as well as arbitral awards and international court cases have been retrieved in an attempt to cover the overall ambit of the corresponding practice of States.

This research is essentially based on treaty collections and specialized documents and periodicals available in the David Lubin Memorial Library of the Food and Agriculture Organization of the United Nations. Except for the volumes shown within brackets, the following treaty collections have been systematically scanned:

<u>Treaty series</u>	<u>Years covered</u>	<u>Volumes</u>
HERSTLET, <u>Commercial Treaties</u>	1354-1924	30
HERSTLET, <u>Map of Africa by Treaty</u>	1778-1908	3
BFSP, <u>British and Foreign State Papers</u>	1923-1962	166 (Vol. 1-116)
LNTPS, <u>League of Nations Treaty Series</u>	1922-1944	205
UNTS, <u>United Nations Treaty Series</u>	1944-1973	935 (Vol. 453, 691, 804, 806, 812-813, 815-816, 823, 836, 838-841, 843-845, 847-849, 851-852, 854-861, 863-868, 870-871, 874-894, 896-934)
ST/LEG/SER.B/12 (UN Document)	1816-1960	1

In addition, numerous other sources, indicated in Annex 8, have been consulted and corresponding references given on each Index Card. This has allowed for references to be made also to treaties prior to 1922 - cited for the most part in DE MARTENS, Treaty Collections - and after 1973, found mostly in International Legal Materials and Revue générale de droit international public.

For each international legal instrument, an indication of the subject covered and, where relevant, of detailed provisions, has been given in addition to the title, signatories, date and place of signature thereof. This has been done in order to allow for subsequent research by substantive items.

A particular effort has been also made to identify, where possible, the various water bodies mentioned in each international instrument with reference to the basin to which they belong, as well as of the geographical territories which, today, are affected by any of the provisions thereof.

As to the basin, the definition in Article II of the 1966 Helsinki Rules of the International Law Association has been used, namely the "... geographical area extending over two or more States determined by the watershed limits of the system of waters, including surface and underground waters, flowing into a common terminus".

2. The Index Card

The Index Card has been so devised as to provide, in the shortest possible space, the maximum of substantive information in a standard format. Keys to the Index Card are as follows:

(i) Title: The title of each international instrument is given in the language used in the source of reference consulted. Mention of the signatories has been purposely omitted in the title since these are duly shown under the appropriate key (iv).

(ii) Date and place: Usually this key has been used to simply report the place and date of signature of the corresponding international instrument. In some cases, either the place or the exact date could not be found and has therefore been omitted. In case an international instrument consists of a single or a multiple Exchanges of Letters, the dates of the first and of the last communications only have been reported.

(iii) River/Basin: The names of water bodies are given in small letters. Most, if not all, water bodies cited in the relevant international instrument have been duly listed. Where their number did not permit a full listing under this key, the remaining water bodies have been listed under an appropriate sub-title against the key "Others" (xii).

For international instruments referring to inland waters in general and not specifically to any particular water body or basin, the key "Inland waters" has been used instead.

The name of each basin is given in capital letters. Where the number of basins exceeds the space available under this key, the last basin shows an asterisk (*), which is repeated below the key "Signatories" (iv), or in some cases under the key "Remarks" (xiv), with the list of the remaining basins. In some instances where the number of basins exceeds by far the space available on the Index Card as a whole, no reference is made thereto, but the relevant Index Card number (xv) is duly shown against each basin concerned in Annex 3.

(iv) Signatories: The name of the Signatories is reported, in capital letters, under this key as shown on the international instrument concerned. In addition, the name of the geographical territories concerned today is given, in small letters, in brackets so that these can immediately be identified.

In the case of colonial treaties and of general treaties of commerce and navigation between former Colonial Powers, the territories concerned and the basin or basins which have been mentioned on the Index Cards refer to Dominions, Colonies, Protectorates or Mandates only when an explicit reference thereto appears in the corresponding international instrument. A mention to this effect then appears on the relevant Index Card under the key "Remarks" (xiv).

As to the applicability of multilateral treaties, reference has been made, whenever possible, to signatures, ratifications, accessions, successions and withdrawals as shown in U.N. Document ST/LEG/SER.D/9, Multilateral Treaties in Respect of which the Secretary-General Performs Depositary Functions, New York, 1976.

(v) Nature: In order to facilitate a subsequent research by type of international instruments, it has been attempted, under this key, to classify these into:

- | | |
|--------------------------|--|
| -Bilateral treaties | -Multilateral declarations |
| -Multilateral treaties | -Acts |
| -Unilateral declarations | -Arbitral awards and international court cases |

(vi) Frontier: Treaty provisions relating to the frontier, including exchanges of territories, concerning water bodies, are referred to under this key, together with the relevant Article. The designations "Talweg" or "Thalweg", "Median line" and similar expressions used are those which appear in the corresponding instrument.

(vii) Beneficial uses: Whenever provisions of an international instrument specify one or more beneficial uses of water, such as for domestic, municipal, agricultural, fishing, industrial and mining, transport and navigation (including timber floating), medicinal and thermal, recreational and other beneficial purposes, these are specifically referred to under this key, together with the number of the relevant Article.

(viii) Harmful effects: Whenever provisions of an international instrument specify one or more harmful effects of water, such as floods, overflow, soil erosion and siltation, drainage and sewerage, salinization and other harmful effects, these are specifically referred to under this key, together with the number of the relevant Article.

(ix) Quality: Whenever the provisions of an international instrument specify water quality protection or improvement measures, including pollution control and general environment protection, these are specifically referred to under this key, together with the number of the relevant Article.

(x) Institutions: Whenever the provisions of an international instrument prescribe measures of a technical or an administrative nature through institutionalized consultations or through the establishment of any kind of technical or administrative institution, these are specifically referred to under this key, together with the number of the relevant Article.

Designations used are those appearing in the corresponding international instrument.

(xi) Settlement of disputes: Whenever the provisions of an international instrument contemplate measures of a judicial nature, including procedures for the settlement of disputes, with or without the designation of appropriate institutions, these are specifically referred to under this key, together with the number of the relevant Article.

Where a single institution is competent for both development coordination and dispute settlement, it is mentioned under both keys "Institutions" (x) and "Settlement of disputes" (xi), however, with different numbers of Articles, as the case may be.

Whenever an international instrument, rather than providing for specific dispute settlement measures, merely refers to a prior general or particular instrument, reference is made to that instrument under the key "Remarks" (xiv), together with the source of reference relating to that general or particular instrument.

(xii) Others: This key has been used to indicate any provision of a given international instrument not relating to the immediate purposes of the Systematic Index, but being of interest to the geographical or hydrological designations appearing therein. In addition, this key has been used as a saving key to provide additional space for other more lengthy descriptions or remarks.

(xiii) References and languages: The reference, or references, to the source, or sources, in which the text of the respective international instrument has been found are duly shown under this key, together with the language, or languages, in which it is reproduced. In order to save space, references have been shown in an abridged form, the full title appearing in Annex 8.

When citing treaty collections, the system used has been to quote first the number of the volume, then the name of the collection and, lastly, the number of the page.

References shown in brackets relate to sources which quote the relevant instrument of which the text could not be actually consulted.

As to Index Cards not showing any reference, either the instrument has not been published or the reference thereto has been quoted from other sources, in which case, either the mention "Quoted in" or "Not published" appears in brackets under the key "Remarks" (xiv).

The keys used for languages, which appear in brackets after each source of reference, and which indicate the language of the international instrument cited, are as follows:

A	Afghan	G	German	R	Russian
Ar	Arabic	Gr	Greek	Rou	Romanian
Bul	Bulgarian	H	Hungarian	S	Swedish
C	Czech	I	Italian	Sc	Serbo-Croat
Ch	Chinese	Jap	Japanese	Si	Siamese
D	Danish	L	Latvian	Sl	Slovene
Du	Dutch	Li	Lithuanian	Sp	Spanish
E	English	N	Norwegian	T	Turkish
Es	Estonian	P	Polish	U	Ukrainian
F	French	Pe	Persian	V	Vietnamese
Pi	Finnish	Por	Portuguese	Y	Yugoslavian

(xiv) Remarks: This key is used to specify any matter of interest not shown elsewhere on the Index Card such as (where available): the date of coming into force and duration of the instrument; ratifications, accessions, successions, modifications and denunciations; prior instruments referred to, together with the source of reference; subsequent instruments in which reference is made to the relevant instrument, together with the source of reference; and a brief description of the content of Annexes to the instrument, where these are of major importance.

In addition, this key has been used to provide additional space for other keys whenever needed.

(xv) Chr.: Each international instrument has been classified chronologically and given a three-digit number which appears under this key. These numbers have subsequently been used as Index Card identification numbers in Annexes 1 and 2.

(xvi) C : Each international instrument is further classified by Region according to the geographical location of the basin or basins concerned. The keys used for this purpose are the following:

Af	Africa
As	Asia
CAM	Central America
E	Europe
ME	Middle East
NAM	North America
SAM	South America

(xvii) B : All basins for which there is at least one international instrument have been retrieved and numbered alphabetically, each being given a three-digit number. The number of each basin, or system of basins, as the case may be, is shown on each Index Card under this key.

Where less than 6 but not more than 10 basins are of relevance to the same international instrument, the last basin number shows an asterisk (*) which is reproduced under the key "References and Languages" (xiii) with the remaining basin numbers.

Where more than 10 basins are of relevance to the international instrument, a double asterisk (**) is shown under this key instead of basin numbers, but the name of all basins concerned is shown against each corresponding "Country" in Annex 4.

(xviii) N : Each international instrument has also been classified according to the nature thereof as discussed in (v) above. The keys used for this purpose are the following:

- I - Bilateral treaty
- II - Multilateral treaty
- III - Unilateral declaration
- IV - Multilateral declaration
- V - Act
- VI - Arbitral award (and international court case)

Remarks

In all cases where a single Index Card was not sufficient to accommodate all the information required, two Index Cards have been used for the same international instrument. In this case, "References and languages" (xiii) appear on the first Index Card, while the second bears the mentions "Ibidem" under the keys "Title" (i) and "River/Basin" (iii), repeats the "Date and place" (ii) of signature, and bears all relevant keys on the bottom right hand side corner.

3. Annex 1

All Index Cards, reproduced by photo-reduction process, appear chronologically in Annex 1.

4. Annex 2

The number of all Index Cards relating to international instruments pertaining to water bodies today no longer forming part of an international basin are listed in Annex 2.

5. Annex 3

Geographical territories which, today, are comprised within the same basin are shown against that basin which has been classified alphabetically and numbered in Annex 3.

Systems of international basins either naturally or artificially inter-connected are shown with an asterisk (*); national basins either naturally or artificially connected to an international basin are shown with a double asterisk (**). In the latter case, however, the national-cum-international basins system has been treated as a single international basin and given its own number.

In addition, remarks have been used where relevant to indicate cross-references and the nature of the hydrological connection between basins.

6. Annex 4

The basin, basins or systems of basins of relevance to each territory are shown against each "Country" in Annex 4.

In addition to designations of current use, the list of countries contains names of historical reference as they appear in the relevant international instrument, together with a cross-reference to the corresponding designation of current use. For an indication of the territorial implications of such historical names, reference should be made to Annex 7.

7. Annex 5

An alphabetical list of basins by "Region" is given in Annex 5. The classification system used for each Region is as follows:

Africa	(Af)	Asia	(As)
North America	(NAm)	Middle East	(ME)
Central America	(CAm)	Europe	(E)
South America	(SAm)		

Each basin bears its alphabetical number, asterisk (*) or asterisks (**) as explained under 5. above; hydrological connections and cross-references are given under "Remarks".

Remarks

In the elaboration of Annexes 4 and 5, use has been made of U.N. Document E/C.7/71, "Register of International River Basins", (1977) in order to verify the list of basins and corresponding countries in these Annexes.

8. Annex 6

An attempt has been made in Annex 6 to identify, against each historical designation of signatories appearing in the relevant international instrument, the territories which may be concerned today, together with the period during which such territories were implied under such historical designations. In addition, the status of such territories during these periods is mentioned whenever possible.

The major sources of reference for this identification work are The Columbia Lippincott Gazetteer of the World, Columbia University Press, New York, 1966, and Webster's New Geographical Dictionary, Springfield, Massachusetts, 1977.

9. Annex 7

Attempt is made in Annex 7 to give the geographic location of each water body referred to under key "River/Basin" (iii) of the Index Card and to indicate its immediate hydrological connection, together with the geographical areas concerned and the basin to which it belongs.

It is thus possible, by referring systematically to each immediate hydrological connection, to reconstitute the hydrographic system of each basin.

Whenever one and the same water body bears different names, appropriate cross-references are shown under "Remarks".

It has not been possible, however, to quote systematically all names of water bodies cited in each international instrument, nor to identify effectively each one on the maps consulted. In these cases, the name of the corresponding water body is omitted from the Index Cards as well as from this Annex.

10. Annex 8

A comprehensive alphabetical list of all sources of reference consulted in the preparation of this Systematic Index is given in Annex 8.

Each reference is also classified into the following main categories of sources:

- (*) Treaty collections
- (**) Monographs
- (***) Documents and periodicals

NOTE EXPLICATIVE

1. Portée de la recherche et mode selon lequel elle a été effectuée

Le but de ce travail de recherche a été de compiler une source de références aux traités et autres instruments juridiques internationaux qui concernent les divers aspects de la gestion des ressources en eau non-maritimes.

Outre les traités bilatéraux et multilatéraux, cet ouvrage contient des références à des déclarations unilatérales affectant le statut juridique d'eaux internationales et à des déclarations gouvernementales multilatérales, à des textes législatifs nationaux disposant de mesures ayant des effets sur le plan international, de même qu'à des sentences arbitrales et à des décisions de cours de justice internationale, ceci dans le but de couvrir dans la mesure du possible l'ensemble de la pratique des Etats dans ce domaine.

Cette recherche est essentiellement basée sur les collections de traités et les documents et revues spécialisées que contient la Bibliothèque David Lubin de l'Organisation des Nations Unies pour l'alimentation et l'agriculture. A l'exception des volumes indiqués entre parenthèses, les collections de traités suivantes ont été dépouillées de façon systématique :

<u>Série de traités</u>	<u>Période couverte</u>	<u>Volumes</u>
HERSTLET, <u>Commercial Treaties</u>	1354-1924	30
HERSTLET, <u>Map of Africa by Treaty</u>	1778-1908	3
BFSP, <u>British and Foreign State Papers</u>	1923-1962	166 (Vol. 1-116)
LNTS, <u>Série des traités de la Société des Nations</u>	1922-1944	205
UNTS, <u>Série des traités des Nations Unies</u>	1944-1973	936 (Vol. 453, 691, 804, 806, 812-813, 815-816, 823, 838-841, 843-845, 847-849, 851-852, 854-861, 863-868, 870-871, 874-894, 896-934)
ST/LEG/SER.B/12 (Document des Nations Unies)	1816-1960	1

De plus, de nombreuses autres sources, qui sont indiquées à l'Annexe 8, ont été consultées et les références correspondantes reportées sur chaque Fiche. Ceci a permis de mentionner également des traités d'avant 1922 - cités pour la plupart dans les collections de traités de DE MARTENS - et postérieurs à 1973, pour lesquels la plupart des textes se trouvent dans International Legal Materials et dans la Revue générale de droit international public.

Outre le titre, les signataires, le lieu et la date de signature de chaque instrument juridique international, une indication de la substance traitée a été donnée, de même que de certaines dispositions détaillées importantes. Ceci a été réalisé dans le but de permettre des recherches ultérieures par matière.

Un effort particulier a été fait pour identifier dans la mesure du possible les diverses masses d'eau mentionnées dans chaque instrument international, en indiquant le bassin auquel elles appartiennent de même que les territoires qui, aujourd'hui, sont concernés par les dispositions de ces instruments.

En ce qui concerne la définition du terme "bassin", il a été fait usage de celle de l'Article II des Règles d'Helsinki adoptées en 1966 par l'International Law Association, soit : "... la zone géographique qui s'étend sur deux ou plusieurs Etats et qui est délimitée par la ligne de partage des eaux, comprenant à la fois les eaux de surface et les eaux souterraines s'écoulant dans un terminus commun."

2. La Fiche

La fiche a été conçue de manière à permettre de donner, selon un format uniformisé, le maximum d'informations substantielles dans l'espace le plus restreint possible. La fiche porte les codes suivants :

(i) Title (Titre) : Le titre de chaque instrument international a été cité, sans faire mention des signataires, dans la langue qu'utilise la source consultée. La mention des signataires a été omise intentionnellement dans le titre vu qu'elle apparaît expressément en regard du code approprié (iv).

(ii) Date and Place (Date et lieu) : Ce code a généralement été utilisé simplement pour indiquer le lieu et la date de signature de l'instrument international correspondant. Dans certains cas, soit le lieu, soit la date exacte n'ont pu être identifiés et ont donc été omis. Dans les cas où un instrument international consiste en un échange de lettres, simple ou multiple, seules les dates des communications initiales et finales ont été reportées.

(iii) River/Basin (Cours d'eau/bassin) : Le nom des masses d'eau est indiqué en minimales. La plupart, si ce n'est toutes les masses d'eau citées dans l'instrument international correspondant figurent sous ce code. Lorsque leur nombre est trop important pour en permettre la liste complète, les masses d'eau restantes sont énumérées en regard du code "Others" (Autres questions) (xii), suivi d'un sous-titre approprié.

Quant aux instruments internationaux concernant des eaux intérieures en termes généraux et non une masse d'eau où un bassin particuliers, le code "Inland waters" (Eaux intérieures) a été utilisé.

Le nom de chaque bassin est indiqué en majuscules. Lorsque le nombre de bassins excède l'espace disponible sous ce code, un astérisque (*) a été placé en regard du dernier bassin de la liste et répété en dessous du code "Signatories" (Signataires) (iv) ou, dans certains cas, sous le code "Remarks" (Remarques) (xiv) avec la liste des bassins restants. Dans les cas où le nombre des bassins excède l'espace disponible sur la Fiche dans son ensemble, aucun bassin n'est alors mentionné mais le numéro de la Fiche concernée (xv) est expressément reporté en face de chaque bassin correspondant à l'Annexe 3.

(iv) Signatories (Signataires) : Le nom des Signataires, ainsi qu'il apparaît dans l'instrument international correspondant, est mentionné en majuscules sous ce code. En outre, le nom des territoires géographiques concernés aujourd'hui par les dispositions de l'instrument cité, est indiqué en minuscules entre parenthèse afin que ces territoires puissent être identifiés immédiatement.

Lorsqu'il s'agit de traités coloniaux et des traités de commerce et de navigation généraux entre anciennes puissances coloniales, les territoires intéressés et le ou les bassins correspondants mentionnés sur les Fiches ne se réfèrent aux Dominions, Colonies, Protectorats ou Mandats que lorsqu'il y est fait expressément référence dans l'instrument international cité. Une mention à cet effet est alors inscrite sur la Fiche en question sous le code "Remarks" (Remarques) (xiv).

En ce qui concerne l'application des traités multilatéraux, le statut des signatures, accessions, successions et dénonciations est indiqué chaque fois que possible selon les indications que donne le Document des Nations Unies No ST/LEG/SER.D/9, Traités multilatéraux pour lesquels le Secrétaire Général exerce les fonctions de dépositaire, New York, 1976.

(v) Nature : Aux fins de faciliter une recherche ultérieure par catégorie d'instruments internationaux, un essai de classification a été fait en regard de ce code de la manière suivante :

- | | |
|-----------------------------|-------------------------------|
| - Traités bilatéraux | - Déclarations multilatérales |
| - Traités multilatéraux | - Textes législatifs |
| - Déclarations unilatérales | - Jurisprudence |

(vi) Frontier (Frontière) : Les dispositions de traités relatives à la frontière, y compris les échanges de territoires, et qui intéressent des masses d'eau sont citées en regard de ce code avec mention de l'Article correspondant. Les désignations "Talweg" ou "Thalweg", "Ligne médiane" et autres expressions similaires citées sont celles qui figurent dans l'instrument international considéré.

(vii) Beneficial uses (Utilisations avantageuses) : Chaque fois que des dispositions d'un instrument international mentionnent une ou plusieurs utilisations avantageuses des eaux, telles qu'à des fins domestiques, municipales, agricoles, de pêche, industrielles et minières, de transport et de navigation (y compris le flottage), médicales et thermales, de loisirs ou à d'autres fins, elles sont expressément citées en regard de ce code, avec le numéro de l'Article correspondant.

(viii) Harmful effects (Effets nuisibles) : Chaque fois que des dispositions d'un instrument international mentionnent un ou plusieurs effets nuisibles des eaux, tels que les inondations, les submersions des berges, l'érosion des sols et l'envasement, le drainage et l'évacuation des eaux usées, la salinisation et d'autres effets nuisibles, elles sont expressément citées en regard de ce code, avec le numéro de l'Article correspondant.

(ix) Quality (Qualité) : Chaque fois que des dispositions d'un instrument international mentionnent des mesures visant à la protection ou à l'amélioration de la qualité de l'eau, y compris la lutte contre la pollution et la protection du milieu, elles sont expressément citées en regard de ce code, avec le numéro de l'Article correspondant.

(x) Institutions : Chaque fois que les dispositions d'un instrument international prévoient des mesures de nature technique ou administrative au moyen de consultations institutionnalisées ou par la création de tout type d'institution technique ou administrative, elles sont expressément citées en regard de ce code, avec le numéro de l'Article correspondant.

Les désignations employées sont celles qui figurent dans l'instrument international correspondant.

(xi) Settlement of disputes (Solution des litiges) : Chaque fois que des dispositions d'un instrument international prévoient des mesures de nature judiciaire, y compris de procédure en vue de la solution des litiges, avec ou sans désignation d'une institution appropriée, elles sont expressément citées en regard de ce code, avec le numéro de l'Article correspondant.

Lorsque la même institution est compétente à la fois pour la coordination des activités de mise en valeur et pour la solution des litiges, celle-ci est citée aussi bien en regard du code "Institutions"(x) que "Solution des litiges" (xi), toutefois avec des numéros d'Articles différents s'il y a lieu.

Chaque fois qu'un instrument international, plutôt que de prévoir des mesures spécifiques pour la solution des litiges, se limite à renvoyer à un instrument général ou spécial antérieur, celui-ci est expressément cité, avec sa source, sous le code "Remarks" (Remarques) (xiv).

(xii) Others (Autres questions) : Le code a été utilisé pour mentionner toutes dispositions d'un instrument international donné n'intéressant pas directement les objectifs immédiats du Répertoire systématique, mais présentant un intérêt en ce qui concerne les désignations géographiques ou hydrologiques qui y sont jointes. Ce code a en outre été utilisé en tant que code de secours pour fournir de la place supplémentaire aux autres descriptions ou remarques d'une plus grande ampleur.

(xiii) References and languages (Références et langues) : La ou les références, de même que la ou les sources relatives au texte de chaque instrument international, sont explicitement citées sous ce code avec la ou les langues dans lesquelles celui-ci est publié. De façon à gagner de la place, les références sont données sous forme abrégée, leur libellé complet apparaissant à l'Annexe 8.

Le système utilisé pour se référer à des collections de traités consiste à citer en premier lieu le numéro de volume, puis le nom de la collection et, enfin, le numéro de la page.

Les références indiquées entre parenthèses concernent des sources dans lesquelles l'instrument correspondant est cité mais dont le texte n'a pas pu être consulté en fait.

Quant aux Fiches qui n'indiquent aucune référence, il s'agit de cas dans lesquels soit le texte de l'instrument n'a pas été publié, soit que cette référence est reprise d'une autre source; dans ce dernier cas, la mention "Quoted in ..." (Cité dans ...) ou "Not published" (Non publié) figure entre parenthèses sous le code "Remarks" (Remarques) (xiv).

Le code utilisé pour les langues, et qui paraît entre parenthèses après chaque référence pour indiquer la ou les langues dans lesquelles le texte de l'instrument est publié, est le suivant :

A	Afghan	G	Allemand	R	Russe
Ar	Arabe	Gr	Grec	Rou	Roumain
Bul	Bulgare	H	Hongrois	S	Suédois
C	Tchèque	I	Italien	Sc	Serbo-croate
Ch	Chinois	Jap	Japonais	Si	Siamois
D	Danois	L	Latvien	Sl	Slovène
Du	Hollandais	Li	Lithuanien	Sp	Espagnol
E	Anglais	N	Norvégien	T	Turque
Es	Estonien	P	Polonais	U	Ukrainien
F	Français	Pe	Persan	V	Vietnamien
Pi	Finlandais	Por	Portugais	Y	Yougoslave

(xiv) Remarks (Remarques) : Ce code a été utilisé pour les toutes questions pertinentes n'apparaissant pas ailleurs sur la Fiche, telles que (lorsqu'elles sont disponibles) : la date d'entrée en vigueur et la validité de l'instrument, les ratifications, accessions, successions, modifications et dénonciations, les instruments antérieurs cités (avec la source correspondante), tous instruments postérieurs se référant à l'instrument en question (avec la source correspondante), ainsi qu'une brève description du contenu des Annexes de l'instrument en question lorsqu'elles sont d'importance majeure.

Ce code a en outre été utilisé aux fins de fournir l'espace supplémentaire nécessaire à d'autres codes.

(xv) Chr. : Chaque instrument international a été classé par ordre chronologique et s'est vu attribué un numéro de trois chiffres qui est reporté sous ce code. Ces numéros ont ensuite servi à identifier les Fiches dans les Annexes 1 et 2.

(xvi) C : Chaque instrument international a en outre été classé par Région en fonction de la situation géographique du bassin, ou des bassins intéressés. Les codes utilisés dans ce but sont les suivants :

Af	Afrique
As	Asie
CAM	Amérique centrale
E	Europe
ME	Moyen-orient
NAM	Amérique du nord
SAM	Amérique du sud.

(xvii) B : Tous les bassins pour lesquels il existe au moins un instrument international ont été retenus et numérotés par ordre alphabétique; un numéro de trois chiffres a été attribué à chaque bassin. Le numéro de chaque bassin, ou système de bassins selon le cas, apparaît sous ce code sur chaque Fiche.

Lorsque le nombre de bassins intéressant le même instrument international est compris entre 6 et 10, le dernier bassin de la liste porte un astérisque (*) qui est reproduit sous le code "References and languages" (Références et langues) (xiii) avec la liste des bassins restants.

Lorsque le nombre des bassins intéressant le même instrument international est supérieur à 10, un double astérisque (**) figure sous ce code et le nom de chaque bassin correspondant est donné à l'Annexe 4 en regard du "Pays" correspondant.

(xviii) N : Chaque instrument international a également été classé selon la catégorie à laquelle il appartient ainsi qu'il est mentionné au point (v) ci-dessus. Les codes utilisés à cet effet sont les suivants :

- I - Traité bilatéral
- II - Traité multilatéral
- III - Déclaration unilatérale
- IV - Déclaration multilatérale
- V - Texte législatif
- VI - Jurisprudence

Remarque

Dans tous les cas où une seule Fiche n'était pas suffisante pour fournir toutes les informations nécessaires, deux Fiches ont été utilisées pour le même instrument international. Dans ces cas, le code "References and languages" (Références et langues) figure sur la première Fiche alors que la seconde porte la mention "Ibidem" aux codes "Title" (Titre) (i) et "River/Basin" (Cours d'eau/bassin) (iii), répète la mention "Date and Place" (lieu et date de signature) (ii) et indique tous les codes appropriés au bas de la Fiche à droite.

3. Annexe 1

Toutes les fiches, reproduites par photo-réduction, sont publiées par ordre chronologique à l'Annexe 1.

4. Annexe 2

La liste des numéros de toutes les Fiches concernant des instruments internationaux relatifs à des masses d'eau ne faisant plus partie aujourd'hui d'un bassin international figure à l'Annexe 2.

5. Annexe 3

Les territoires géographiques qui se trouvent aujourd'hui compris dans un même bassin figurent en regard de ce bassin, classé et numéroté par ordre alphabétique, à l'Annexe 3.

Les systèmes de bassins internationaux inter-connectés aussi bien naturellement qu'artificiellement portent un astérisque (*); les bassins nationaux connectés aussi bien naturellement qu'artificiellement à un bassin international portent un double astérisque (**). Dans ce cas, toutefois, ce système de bassins national et international a été traité en tant que bassin international unique, et porte son propre numéro.

Une colonne de Remarques a en outre été utilisée pour indiquer les renvois et la nature de l'inter-connection hydrologique des bassins.

6. Annexe 4

Le bassin, les bassins ou le système de bassins concernant chaque territoire figurent à l'Annexe 4 en regard de chaque "Pays".

Outre les désignations d'usage courant, la liste des pays contient des noms de caractère historique tels qu'ils figurent dans l'instrument international cité avec un renvoi à la désignation d'usage courant. Quant aux conséquences territoriales de ces désignations historiques, il y a lieu de se référer à l'Annexe 7.

7. Annexe 5

Une liste alphabétique des bassins par "Région" figure à l'Annexe 5. Le système de classification qui a été utilisé est le suivant :

Afrique (Af)	Asie (As)
Amérique du nord (NAm)	Moyen-orient (ME)
Amérique centrale (CAm)	Europe (E)
Amérique du sud (SAm)	

Chaque bassin porte son numéro par ordre alphabétique, un astérisque (*) ou deux astérisques (**) ainsi qu'il est expliqué au point 5.ci-dessus; les connections hydrologiques de même que les renvois sont donnés dans la colonne des "Remarques".

Remarque

Le Document des Nations Unies N° E/C.7/71, "Register of International River Basins" (1977) a été utilisé, lors de l'élaboration des Annexes 4 et 5, pour vérifier la liste des bassins et des pays correspondants figurant dans ces Annexes.

8. Annexe 6

Il a été procédé à l'Annexe 6 à un essai d'identification de la désignation historique des signataires telles qu'elles figurent dans l'instrument international correspondant, des territoires qui pourraient aujourd'hui être concernés, de même que de la période durant laquelle ces territoires étaient implicitement compris au titre de ces désignations historiques. Le status de ces territoires pendant ces périodes a en outre été indiqué chaque fois que cela a été possible.

Les principales sources de référence utilisées pour ce travail d'identification sont The Columbia Lippincott Gazetteer of the World, Columbia University Press, New York, 1966 et le Webster's New Geographical Dictionary, Springfield, Massachusetts, 1977.

9. Annexe 7

Il a été procédé à l'Annexe 7 à un essai de localisation géographique de chaque masse d'eau figurant sous le code "River/Basin" (Cours d'eau/bassin) (iii) de la Fiche tout en indiquant sa connection hydrologique immédiate ainsi que les territoires géographiquement intéressés et le bassin auquel elle appartient.

En se référant de manière systématique à chaque connection hydrologique immédiate, il est donc possible de reconstituer le système hydrologique de chaque bassin.

Chaque fois qu'une même masse d'eau porte des noms différents, un renvoi approprié figure dans la colonne des "Remarques".

Il n'a toutefois pas été possible de reprendre systématiquement tous les noms de masses d'eau cités dans chaque instrument international, ni de les identifier tous sur la base des cartes qui ont été consultées. Dans ces cas, le nom de la masse d'eau correspondante a été omis de la Fiche de même que de cette Annexe.

10. Annexe 8

Une liste alphabétique complète de toutes les sources de références consultées lors de la préparation de ce Répertoire systématique figure à l'Annexe 8.

Chaque référence a en outre été classée selon les catégories de sources suivantes :

- (*) Collection de traités
 - (**) Monographies
 - (***) Documents et revues.
-

NOTA EXPLICATIVA

1. Objeto y modo como se ha realizado la investigación

El propósito de este trabajo de investigación ha sido organizar una fuente de referencia de tratados y otros instrumentos jurídicos internacionales relacionados con los diversos aspectos de la gestión de los recursos hídricos no marítimos.

Además de los tratados bilaterales y multilaterales, se han incorporado declaraciones unilaterales relacionadas con la situación legal de las aguas internacionales y declaraciones multilaterales de gobiernos, textos legislativos, nacionales que establecen medidas que tienen inferencias internacionales, así como laudos arbitrales y casos de tribunales internacionales, con el fin de tratar y cubrir el ámbito global de la práctica correspondiente de los Estados.

Esta investigación se basa esencialmente en colecciones de tratados y en documentos y publicaciones especializados disponibles en la Biblioteca David Lubin de la Organización de las Naciones Unidas para la Agricultura y la Alimentación. Excepto en lo que respecta a los volúmenes que figuran entre corchetes, se han consultado sistemáticamente las ediciones de tratados siguientes:

<u>Series de Tratados</u>	<u>Años incluidos</u>	<u>Volúmenes</u>
HERSTLET, <u>Commercial Treaties</u>	1354-1924	30
HERSTLET, <u>Map of Africa by Treaty</u>	1778-1962	3
BFSP, <u>British and Foreign States Papers</u>	1923-1962	166 (Vol. 1-116)
LNTS, <u>League of Nations Treaty Series</u>	1922-1944	205
UNTS, <u>United Nations Treaty Series</u>	1944-1973	935 (Vol. 453, 691, 804, 806, 812-813, 815-816, 823, 836, 838-841, 843-845, 847-849, 851-852, 854-861, 863-868, 870-871, 874-894, 896-934)
ST/LEG/SER.B/12 (Documento de las Naciones Unidas)	1816-1960	1

Además, otras numerosas fuentes, indicadas en el Anexo 8, han sido consultadas y se dan las referencias correspondientes en cada Ficha. Esto se ha tenido en cuenta para referencias que se hacen igualmente a tratados anteriores a 1922 - citadas, en su mayoría, en la colección de tratados DE MARTENS - y posteriores a 1973, que se hallan, la mayor parte, en International Legal Materials y Revue générale de droit international public.

De cada instrumento jurídico internacional, además del título, signatarios, fecha y lugar de la firma de los mismos, se da una indicación de la materia de que se trata y, cuando es oportuno, disposiciones detalladas. Se ha hecho esto para tener en cuenta investigaciones posteriores por temas substantivos.

Se ha hecho también un esfuerzo especial para identificar, cuando ha sido posible, las varias masas de agua mencionadas en cada instrumento internacional con referencia a la cuenca a que pertenecen, así como al territorio geográfico al que hoy están relacionadas por las disposiciones de dichos instrumentos.

En cuanto a las cuencas, se ha utilizado la definición del Artículo II de las Normas de Helsinki de la International Law Association, a saber "una zona geográfica que se extiende sobre dos o más Estados y que está determinada por la divisoria del sistema de aguas, incluidas las de superficie y las subterráneas, que fluyen a un término común."

2. Las Fichas

Las Fichas han sido concebidas para facilitar, en el menor espacio posible, el máximo de información substantiva en un formato "standard". Las claves de las Fichas son las siguientes:

i) Title (Título): El título de cada instrumento internacional se presenta, sin mencionar a los signatarios, en el idioma utilizado en la fuente de referencia consultada. La mención se ha omitido a propósito en el título, ya que los signatarios aparecen debidamente en la clave apropiada (iv).

ii) Date and Place (Fecha y lugar): Normalmente, esta clave se ha utilizado para indicar, simplemente, el lugar y la fecha de la firma del instrumento internacional correspondiente. En algunos casos, tanto el lugar como la fecha exacta no han podido ser hallados y, por tanto, se han omitido. En el caso de que un instrumento internacional consista en uno o varios Cambios de Notas, se han indicado solamente las fechas de la primera y la última comunicación.

iii) River/Basin (Río/Cuenca): El nombre de las masas de agua se da en letras minúsculas. La mayoría, si no todas las masas de agua citadas en el instrumento internacional correspondiente, han sido debidamente enumeradas. Cuando su número no permite una mención total en esta clave, las masas de agua restantes se han mencionado bajo un subtítulo apropiado en la clave "Others" (Otras cuestiones) (xii).

Respecto de los instrumentos internacionales que se refieren a aguas interiores en general y no específicamente a una masa de agua o cuenca particular, se ha utilizado en su lugar la clave "Inland waters" (Aguas interiores).

El nombre de cada cuenca se da en letras mayúsculas. Cuando el número de las cuencas supera el espacio disponible en esta clave, la última cuenca lleva un asterisco (*), que se repite en la clave "Signatories" (Signatarios) (iv) o, en algunos casos, en la clave "Remarks" (Observaciones) (xiv), con la lista de las restantes cuencas. En algunos casos, cuando el número supera con mucho el espacio disponible en la Ficha en su conjunto, no se hace referencia a ello, pero se indica debidamente el número de la Ficha pertinente frente a cada cuenca correspondiente, en el Anexo 3.

(iv) Signatories (Signatarios): El nombre de los signatarios figura, en letras mayúsculas, en esta clave, tal como aparece en el instrumento internacional correspondiente. Además, el nombre de los territorios geográficos a los que corresponden hoy, se da en letras

minúsculas, entre corchetes, de forma que pueden ser identificadas inmediatamente.

En el caso de tratados coloniales y de tratados de comercio y de navegación generales entre antiguas Potencias coloniales, los territorios interesados y las correspondientes cuenca o cuencas que se han mencionado en las Fichas se refieren a Dominios, Colonias, Protectorados o Mandatos solamente cuando una referencia explícita a los mismos aparece en el correspondiente instrumento internacional. A este fin figura entonces una mención en la Ficha pertinente en la clave "Remarks" (Observaciones) (xiv).

En cuanto a la aplicabilidad de los tratados multilaterales, se hace una referencia, cuando ello es posible, a firmas, ratificaciones, adhesiones, sucesiones y denuncias, tal como aparecen en el documento de las Naciones Unidas ST/LEG/SER.D/9, Multilateral Treaties in Respect of which the Secretary-General Performs Depositary Functions, Nueva York, 1976.

v) Nature (Naturaleza): Con objeto de facilitar la investigación subsiguiente por tipo de instrumento internacional, se ha procurado, en esta clave, clasificarlos en:

- | | |
|------------------------------|--|
| - Tratados bilaterales | - Declaraciones multilaterales |
| - Tratados multilaterales | - Textos legislativos |
| - Declaraciones unilaterales | - Laudos arbitrales (incluidos casos de tribunales internacionales). |

vi) Frontier (Frontera): Las disposiciones de un tratado referentes a la frontera, incluidos cambios de territorios, que afecten a masas de agua, se mencionan en esta clave, junto con los Artículos pertinentes. Las denominaciones "Talweg" o "Thalweg", "Línea media" y otras expresiones semejantes utilizadas, son las que aparecen en el instrumento correspondiente.

vii) Beneficial uses (Usos beneficiosos): Cuando las disposiciones de un instrumento internacional especifiquen uno o más usos beneficiosos del agua, tales como domésticos, municipales, agrícolas, pesca, industriales y mineros, transporte y navegación (incluida la flotación de la madera), medicinales y termales, recreativos y otros usos beneficiosos, están mencionadas específicamente en esta clave, junto con el número del artículo pertinente.

viii) Harmful effects (Efectos perjudiciales): Cuando las disposiciones de un instrumento internacional especifiquen uno o más efectos perjudiciales del agua, tales como inundaciones, desbordamientos, erosión del suelo y en encenegamiento avenamiento y evacuación de las aguas usadas, salinización y otros efectos perjudiciales, están mencionadas específicamente en esta clave, junto con el número del artículo pertinente.

ix) Quality (Calidad): Cuando las disposiciones de un instrumento internacional especifiquen la protección de la calidad del agua o medidas de protección, incluida la lucha contra la contaminación y la protección general del medio ambiente, están mencionadas específicamente en esta clave, junto con el número del artículo pertinente.

x) Institutions (Instituciones): Cuando las disposiciones de un instrumento internacional contengan medidas de carácter técnico o administrativo a través de consultas institucionalizadas o a través del establecimiento de cualquier tipo de institución técnica o administrativa, están mencionadas específicamente en esta clave, junto con el número del artículo pertinente.

Las denominaciones utilizadas son las que aparecen en el instrumento internacional correspondiente.

xi) Settlement of disputes (Solución de las controversias): Cuando las disposiciones de un instrumento internacional contengan medidas de naturaleza judicial, incluidos procedimientos para la solución de las controversias, con o sin la designación de instituciones apropiadas, están mencionadas específicamente aquí, junto con el número del artículo pertinente.

Cuando una sola institución es competente tanto para la coordinación del desarrollo como para la solución de las controversias, se menciona en las claves "Institutions" (Instituciones) (x) y "Settlement of disputes" (Solución de las controversias) (xi), pero con diferentes números de artículos según los casos.

Cuando un instrumento internacional, más bien que establecer medidas específicas para solucionar las controversias, se refiere únicamente a un instrumento anterior general o particular, se hace referencia de ello en la clave "Remarks" (Observaciones) (xiv), junto con la fuente de referencia relativa al instrumento general o particular antes mencionado.

xii) Others (Otras cuestiones): Esta clave se emplea para indicar disposiciones de un instrumento internacional determinado que no está relacionado inmediatamente con los propósitos del Repertorio Sistemático, pero que tiene interés por las denominaciones geográficas o hidrológicas que figuran en él. Además, esta clave se ha utilizada como una clave auxiliar, que facilita espacio para otras observaciones o descripciones más prolijas.

xiii) References and languages (Referencias e idiomas): La referencia, o referencias, a una fuente o fuentes en las que se ha encontrado el texto de cada instrumento internacional, se indica debidamente en esta clave, junto con el idioma o idiomas en que está reproducido. Con el fin de ahorrar espacio, las referencias se hacen en forma abreviada, apareciendo el título completo en el Anexo 8.

Cuando se citan colecciones de tratados, el sistema utilizado ha sido citar primero al número del volumen, después el nombre de la colección y por último el número de la página.

Las referencias que aparecen entre corchetes se refieren a fuentes que citan el instrumento pertinente del cual el texto no pudo ser efectivamente consultado.

En cuanto a las Fichas que no contienen ninguna referencia, o el instrumento no ha sido publicado o la referencia al mismo ha sido recogida en otra parte, en cuyo caso aparecerá entre corchetes la mención "Quoted in ..." (Citado en ...) o "Not published" (No publicado) en la clave "Remarks" (Observaciones) (xiv).

Las claves utilizadas para los idiomas, que aparecen entre corchetes después de cada fuente de referencia y que indican el idioma del instrumento internacional, son las siguientes:

A	Afgano	Fi	Finés	Pe	Persa
Ar	Arabe	G	Alemán	Por	Portugués
Bul	Búlgaro	Gr	Griego	S	Sueco
C	Checo	H	Húngaro	Se	Servocroata
Ch	Chino	I	Italiano	Si	Siamés
D	Danés	Jap	Japonés	Sl	Esloveno
Du	Holandés	L	Letón	Sp	Español
E	Inglés	Li	Lituano	U	Ucraniano
Es	Estonio	N	Noruego	V	Vietnamita
F	Francés	P	Polaco	Y	Yugoslavo

xiv) Remarks (Observaciones): Esta clave se utiliza para especificar cualquier asunto de interés no indicado en otra parte en las Fichas como, por ejemplo, cuando se conozca: la fecha de entrada en vigor y la duración del instrumento; ratificaciones, adhesiones, sucesiones, modificaciones y denuncias; instrumentos anteriores a que se hace referencia, junto con la fuente de referencia correspondiente; instrumentos posteriores en los que se hace referencia al instrumento pertinente, junto con la fuente de referencia correspondiente; y una breve descripción del contenido de los Anexos del instrumento, cuando sea de gran importancia.

Además, esta clave se ha utilizado para facilitar espacio adicional a otras claves, cuando fuere necesario .

xv) Chr. (Crono.): Cada instrumento internacional ha sido clasificado cronológicamente y se le dan tres números dígitos, que figuran en esta clave. Estos números han sido utilizados posteriormente como números de identificación de la Ficha en los Anexos 1 y 2.

xvi) C : Cada instrumento internacional ha sido clasificado de nuevo por Región, de acuerdo con la situación geográfica de la cuenca o cuencas de que se trate. Las claves utilizadas con este fin son las siguientes:

Af	Africa	ME	Oriente Medio
As	Asia	NAM	América del Norte
CAM	América Central	SAM	América del Sur
E	Europa		

xvii) B : Todas las cuencas respecto de las cuales existe por lo menos un instrumento internacional han sido anotadas y numeradas alfabéticamente, dándoles a cada una tres números dígitos. El número de cada cuenca o sistema de cuencas, según los casos, se indica en cada Ficha bajo esta clave.

Cuando en un mismo instrumento internacional existan menos de 6, pero no más de 10 cuencas, el último número de cuenca lleva un asterisco (*) que se reproduce en la clave "References and languages" (Referencias e idiomas) (xiii) con los números de cuencas restantes.

Cuando en un instrumento internacional existen más de 10 cuencas se pone un doble asterisco (**) en esta clave en lugar de los números de cuenca, pero el nombre de todas las cuencas de que se trate se indica enfrente de cada "Country" (País) correspondiente en el Anexo 4.

xviii) N : Cada instrumento internacional ha sido clasificado, asimismo, de acuerdo con la naturaleza del mismo, tal como se trata de ello supra en (v). Las claves utilizadas con este fin son las siguientes:

I - Tratado bilateral	IV - Declaración multilateral
II - Tratado multilateral	V - Textos jurídicos
III - Declaración unilateral	VI - Laudos arbitrales (incluidos casos de tribunales internacionales)

Nota

En todos los casos en que una sola Ficha no fue suficiente para facilitar toda la información requerida, se han utilizado dos Fichas para el mismo instrumento internacional. En este caso, "References and Languages" (Referencias e idiomas) (xiii) aparece en la primera Ficha, mientras en la segunda aparece el término "Ibidem" en las claves "Title" (Título) (i) y "River/Basin" (Río/Cuenca) (iii); repite "Date and Place" (Fecha y lugar) (ii) de la firma y contiene todas las claves pertinentes en la esquina derecha de la parte inferior.

3. Anexo 1

Todas las Fichas, reproducidas por el procedimiento de reducción fotográfica, aparecen cronológicamente en el Anexo 1.

4. Anexo 2

El número de todas las Fichas relativas a instrumentos internacionales referentes a masas de agua que hoy en día ya no forman parte de una cuenca internacional, figuran en el Anexo 2.

5. Anexo 3

Los territorios geográficos que actualmente están comprendidos en la misma cuenca, se indican frente a dicha cuenca que ha sido clasificada alfabéticamente y numerada en el Anexo 3.

Los sistemas de cuencas internacionales, interconectados tanto artificial como naturalmente se indican con un asterisco (*); las cuencas nacionales conectadas tanto artificial como naturalmente con una cuenca internacional, se indican con un asterisco doble (**). En este último caso, sin embargo, el sistema de cuencas nacional-cum-internacional se ha tratado como una sola cuenca internacional y se le ha dado su propio número.

Además se han utilizado notas apropiadas cuando eran pertinentes para indicar referencias cruzadas y la naturaleza de la conexión hidrológica entre cuencas.

6. Anexo 4

La cuenca, cuencas o sistemas de cuencas pertinentes a cada territorio se indican frente a cada "Country" (País) en el Anexo 4.

Además de las denominaciones de uso corriente, la lista de países contiene nombres de referencia histórica, tal como aparecen en el instrumento internacional pertinente, junto con una referencia cruzada a la denominación correspondiente de uso corriente. Para una indicación de las inferencias territoriales de los nombres históricos mencionados, debe hacerse referencia al Anexo 7.

7. Anexo 5

En el Anexo 5 figura una lista alfabética de cuencas por "Region" (Región). El sistema de clasificación utilizado para cada Región es el siguiente:

Africa (Af)	Asia (As)
América del Norte (NAm)	Oriente Medio (ME)
América Central (CAm)	Europa (E)
América del Sur (SAm)	

Cada cuenca lleva su número alfabético, asterisco (*) o asteriscos (**) según se explica supra en 5; las conexiones hidrológicas y las referencias cruzadas figuran en "Remarks" (Observaciones) (xiv).

Nota

En la elaboración de los Anexos 4 y 5 se ha utilizado el documento de las Naciones Unidas E/C.7/71 Register of International River Basins (1977), con objeto de comprobar la lista de cuencas y los países correspondientes en estos Anexos.

8. Anexo 6

En el Anexo 6 se ha pretendido identificar al lado de cada denominación histórica de signatarios que figuran en el instrumento internacional pertinente, los territorios a los que hoy podrían corresponder, junto con el período durante el cual dichos territorios fueron adscritos bajo las denominaciones históricas mencionadas. Además, el Status de dichos territorios durante estos períodos, se ha mencionado siempre que ha sido posible.

La principal fuente de referencias para esta tarea de identificación ha sido The Columbia Lippincott Gazetteer of the World, Columbia University Press, Nueva York, 1966, y Webster's New Geographical Dictionary, Springfield, Massachusetts, 1977.

9. Anexo 7

En el Anexo 7 se ha pretendido localizar, geográficamente, cada masa de agua a que se hace referencia en la clave "River/Basin" (Río/Cuenca) (iii) de la Ficha e indicar su conexión hidrológica inmediata, junto con los territorios geográficos correspondientes y la cuenca a la que pertenece.

Al hacer referencia sistemáticamente a cada conexión hidrológica inmediata, es posible, entonces, reconstituir el sistema hidrográfico de cada cuenca.

Cuando la misma masa de agua tiene nombres distintos, las oportunas referencias cruzadas se indican en "Remarks" (Observaciones) (xiv).

No ha sido posible, sin embargo, citar sistemáticamente todos los nombres de las masas de agua citados en cada instrumento internacional, ni identificar efectivamente cada una en los mapas consultados. En estos casos, el nombre de la masa de agua correspondiente se ha omitido en las Fichas, así como en los Anexos.

10. Anexo 8

Una lista completa alfabética de todas las fuentes de referencia consultadas en la preparación de este Repertorio Sistemático figura en el Anexo 8.

Cada referencia ha sido clasificada, además, en las siguientes categorías principales de fuentes:

- * Colecciones de tratados
- ** Monografías
- *** Documentos y publicaciones periódicas

River/Basin: Congo CONGO BASIN	Title: Declaration, Portugal and Congo. Approval of Report of Boundary Commissioners of 26th June, 1893. Lunda Region	Date and Place: March 24, 1894 Brussels
Signatories: PORTUGAL (Angola) INDEPENDENT STATE OF THE CONGO (Zaire)	Nature: Bilateral treaty Frontier: Conveying the approval by the two Governments on the tracing of the frontier executed by their Commissioners in the region of Lunda, in execution of the Convention concluded at Lisbon on 25th May, 1891, art. 2; modifying the frontier as established between the Cuango and the Cassai Rivers in the Treaty of 1891, 25th May. The boundary, whenever established in a river, follows the Thalweg (in the Treaty of 1891, 25th May, the Thalweg was used only for the Cuango and Cassai, the two largest rivers). In particular it follows the Thalweg of the Kwango (Cuango), Fungila (Utungula), Lola, Masba (Wamba), Uwo (Uovo), N'Kosbo, Kasanguna (Casanguna), Lucafa (Lukaf), Kwengo (Quengo), Luita, Kangulungu, Loangud, Lovus, Chicopa. River/Basin: <i>Ididem</i>	Title: <i>Ididem</i>	Date and Place: June 28, 1919 Versailles
	Remarks (Cont'd) *Sept. 28, 1912 (Art. 125). Germany renounces all rights and privileges arising from the Arrangements of 1911 and 1912 regarding Liberia (Art. 138). L'Allemagne, l'Empire Britannique, la France, l'Italie, le Japon, la Belgique, la Bolivie, le Brésil, le Guatemala, le Pérou, la Pologne, le Siam, la Tchécoslovaquie, l'Uruguay, Cuba, la Grèce, Haïti, le Honduras, le Libéria, le Nicaragua, le Panama, le Portugal, la Roumanie et l'Etat Serbe-Croate-Slovène ont ratifié le Traité et déposé leurs instruments de ratification. Par deux Protocoles en date du 21 janvier 1921 et du 29 mars 1927, les Pays-Bas ont adhéré aux modifications apportées par le Traité de Versailles à la Convention de Mannheim de 1868 (Voir : Annuaire Européen, 1956, Vol. II, 275). Germany, in a Note of Nov. 14, 1936 denounced this Treaty, resuming full sovereignty over internationalized German rivers (Rhine, Oder, Elbe, Neinan and Danube) and the Kiel Canal, and no longer considered herself bound by any treaties relative thereto (2, Reichs Gesetzblatt (1936), 361; Documents on International Affairs, published by the Royal Institute of International Affairs, (1937), 283)	Remarks: Entered into force on Jan. 10, 1920

River/Basin: Scheldt-Rhine Canal RHINE/SCHELDTP BASINS	Title: Treaty	Date and Place: April 3, 1925
Nature: Bilateral treaty	Frontier:	Remarks:
Beneficial uses: Construction of the canal aimed at providing Belgium with a better waterway between Antwerp and the Rhine than that offered by the existing natural communications between the two rivers through the so-called "intermediary waters" ¹	Harmful effects:	Quoted in 3, VERZIJL, 222 This Treaty was only forced through the Second Chamber of the Netherlands Parliament in the face of strong opposition but was in event torpedoed by a majority against it in the first Chamber. The controversy has found a final solution in a treaty on May 13, 1963, 540, UNTS, 3
Quality:	Institutions:	
Settlement of disputes:	Others: ¹ mentioned in Art. 2 of the Revised Convention of Mannheim of 1868, in Art. 9.5 of the Treaty of Separation of 1839, in Arts 38-49 of the Treaty of The Hague of 1842 and in the Règlement No. 5 annexed to the Convention of May 20, 1843.

River/Basin: Tibide	Title: <u>Tibide</u>	Date and Place: Jan. 17, 1961 Washington
Signatories:	Remarks (cont.): Upon termination of this Treaty, if the Boundary Water Treaty of 1909 has been terminated in accordance with Article XIV of that Treaty, the provision of Art. II of that Treaty shall continue to apply to the waters of the Columbia River Basin. If upon the termination of this Treaty, Art. II of the Boundary Waters Treaty, 1909, continue in force by virtue of paragraph (3) of this Art., the effect of Art. II of that Treaty, with respect to the Columbia River Basin, may be terminated by either Canada or U.S.A. delivering to the other one year's written notice to that effect, provided, however, that the notice may be given only after the termination of this Treaty. If, prior to the termination of this Treaty, Canada undertakes works usable for, and relating to, a diversion of water from the Columbia River Basin other than works authorized by or undertaken for the purpose of exercising a right under Art. XIII or any other provision of this Treaty, paragraph (3) of this Article shall cease to apply one year after delivery by either Canada or U.S.A. to the other of written notice to that effect (art. 17). See Exchange of Notes constituting an Agreement concerning the above mentioned treaty, Ottawa, May 8-18, 1967 685, UNTS, 418	Remarks: Case into force on Sept. 16, 1964 See Exchange of Notes implementing Art.
